PROFESSIONAL SUMMARY

I am a college student deeply interested in frontend development and web design. My enthusiasm for technology drives me to explore new developer tools daily, build responsive user interfaces, and create efficient, interactive web applications. And I love building webpages what helps in day to day use.

SKILLS

Programming Languages: Python, Java, C, JavaScript, HTML

Web & Frameworks: Flask, HTML, CSS, REST API Development

Databases: MySQL, Firebase, NeonDB

AI / ML / Data Science: Machine Learning, Data Analysis

Cloud & Tools: AWS (Educate-level), Git, GitHub, Jupyter Notebook, VS Code, Agile Fundamentals

PROJECTS

Universal Clipboard *(Vite React, Node.js)*

- Developed a full-stack cross-device clipboard web utility using React and Node.js, enabling seamless, real-time data synchronization across platforms.
- Implemented end-to-end encryption, custom clip expiration controls, and active session management to ensure user data privacy and security.

Next Gen Target Marketing *(JavaScript, Json, MongoDB)*

- Developed a full-stack webpage that generates ads using Gemini APIs, catering to companies seeking advertising solutions.
- The platform calculates product reach based on ad click-through rates and engagement metrics.

Link Manager *(HTML, CSS, JavaScript)*

- Created a responsive link management web application that allows users to save, organize, and filter web bookmarks directly within the browser using local storage.
- Designed a user-friendly frontend UI featuring real-time search, custom tagging, and persistent link storage without relying on external databases.
